HAZCO Environmental Services, a Division of CCS Inc. Announces Recipient of Partners in Injury Reduction Program Award.

CALGARY, Alberta, April 25, 2007 - Congratulations to HAZCO Environmental Services, a division of CCS Inc. and all employees for exceptional performance in workplace health and safety. Our collective continued commitment in support of our health and safety program pays off in many ways!

On April 19, 2007 HAZCO Environmental Services was awarded a cheque for \$111, 379.03 from the Workers' Compensation Board's (WCB) Partners in Injury Reduction Program (PIR) for exceptional performance in workplace health and safety. Dave Desjardins, Lesley MacKinnon and Ronda Bertram attended this event where Lesley was presented with this cheque.

When asked how he felt about this recognition, Jim Rose, General Superintendent was quoted as saying, *"We need to recognize all the field people who's hard work, commitment and passion has ensured the health and safety of all HAZCO employees. This special thanks needs to include Alberta Divisions of Projects, Waste Services, Maintenance Shop, Landfills and Sulphur. Without them, this award wouldn't have been possible. Thank you for your continuing support and commitment to keep HAZCO a safe place to work!"*

"This recognition is a reflection of the safe and compliant culture at HAZCO and everyone can feel proud of the contribution they make towards maintaining that value every day, " said Garry Smith, Vice-President Waste Services Division.

HAZCO was one of only 35 companies to be recognized at this event and receive a cheque. This is a substantial accomplishment as HAZCO has 850 employees and we received a cheque in excess of \$110,000.00, while other companies with employees in excess of 3000 only received cheques for \$127,000.

David Mattinson, Executive Vice-President mentioned that it didn't surprise him that HAZCO received this recognition as HAZCO has invested a great deal into our safety program. *"We have completed two Construction Safety Officer (CSO) Training Programs, certifying 27 employees in 2006 and 19 employees in 2007. In addition, our ongoing Safety Points Program and our Safe Driving Awards keeps safety top of mind as not just behaviour but a value in our company."*

"Safety has always been important to HAZCO and in the last year two years HAZCO has invested considerable manpower and effort into the structure and training of our Safety Department. This cheque is recognition of our efforts," said Don Friesen, Founder and Corporate Health and Safety Officer. He noted a special thanks to the Safety Department headed by Lesley MacKinnon , who will be transferring to our parent company CCS as a Human Resources Business Partner. *"She has left a great legacy and this cheque is a testament to it."*
