## PROJECT HIGHLIGHTS

With a preferred service contract with the Spirit River Waste Authority, the WasteWorks owned and operated Spirit River Waste Management Facility serves the residents of the Municipal District of Spirit River, Saddle Hills County, Brich Hills County, the Village of Rycroft and the Town of Spirit River.

The facility is also equipped with a state-of-the-art designated industrial and oilfield waste disposal cell to serve oil and gas producers in the active Northern Alberta region. In the first year of operating, the landfill accepted over 100,000 tonnes of industrial and oilfield waste.

WasteWorks (HAZCO) has previously been involved in the management of municipal solid waste at landfills in Red Deer County in Alberta and St. Clements in Manitoba.
