PROJECT HIGHLIGHTS

- Undertook complete asbestos removal immediately following the evacuation of the buildings.
- Accomplished a clean interior demolition and the simultaneous demolition of a 4-storey structural and a 4-storey concrete building in order to meet time constraints.
- All concrete and steel were separated on-site and prepared for off-site recycling.
- Most of the demolition occurred at night in order to accommodate the busy downtown Calgary traffic on the surrounding streets.
- Excavated to 40' below grade.
- Installed piling (H-Pile and secant) and tie back anchors to facilitate the future construction of both a 27 storey and a 23 storey building.
- Dewatering.
- Backfilled foundation.
