CONFIDENTIAL CLIENT – WATER TREATMENT PLANT

Project Value: > \$1 Million

Contaminant: PAHs

Owner: Confidential

Consultant: CRA

Date: 1997 - Present

HAZCO Key Team Members:

Gregory Campbell, P.Eng

Paul Halliday/Warren Sandes

PROJECT HIGHLIGHTS

- ❑ Remedial works on a PAH contaminated site along the Fraser River in Vancouver, BC
- ❑ Initial facility demolition and remedial works
- ❑ Construction of a fixed groundwater treatment plant designed for long term treatment of coal tar contaminated groundwater
- ❑ Refurbishment of the plant and containment wells in 2003
- ❑ Operation and maintenance of the plant since 1998
- ❑ Design, supply, installation and operation of a site specific DNAPL removal system
- ❑ Process optimization and ongoing evaluation of treatment techniques
- ❑ Treatment media supply and disposal of on-going waste generated
