PROJECT HIGHLIGHTS

- HAZCO was retained to conduct waste management and disposal for a remotely located diamond mine.
- Onsite waste identification and onsite waste training were completed.
- HAZCO pre-printed waste manifests and labels and supplied a project supervisor.
- Movement was done via airplane from the site to Yellowknife, NWT, then transferred to HAZCO-supplied van trailers for furtherance to the HAZCO transfer station.
- Direct HAZCO shipments were completed by van trailers and bulk tankers from the mine locations.
- The wastes handled included used oil, flammable liquids, corrosive liquids, glycols, paint, sludge, aerosols, and various hazardous solids.
